

## Interior Designer/Project Manager

### Description

We are a small, design studio and lifestyle brand, looking to fill an open position for a Interior Designer/Project Manager. This is an in person opportunity for a self-starter to join a growing business and take it to the next level. Located in the Lakeview neighborhood, we have a 3000 square foot showroom where we represent a range of Italian brands including kitchen & bath cabinetry, closet & wardrobe systems, library & media, and furniture & lighting. Our work is primarily focused on residential spaces.

### Responsibilities

Your primary responsibilities would begin with client communication, modeling design solutions in Google SketchUp for client presentations, along with technical drawings in AutoCAD, for order placement and installation coordination.

As you grow in your mastery of our product lines and their implementation, you will be given opportunities to manage customer projects from start to finish including providing exceptional customer care and sales in the showroom day to day. Our goal is to equip you with product knowledge and a kit of parts so that you can exercise your design skill set with increasing autonomy and project ownership to create beautiful solutions for our customers.

### Qualifications

Our social media presence is often neglected so this would be another potential aspect of your role if you would be interested in stepping in to develop and shepherd this facet of the company.

The candidate must feel comfortable attending industry events, networking with suppliers, interior designers, architects, and potential partners. Experience presenting in person and online is essential.

### Job Benefits

Because the studio is small, collaboration is essential and you will have a chance to wear many hats and actively participate with business development and growth. Tenacity, drive, and perseverance are valued. We are an open book and are happy to share our past successes and failures in hopes of creating an environment to grow you as a designer.
